Clever Dx: A DIAGNOSTIC platform

Unique patented HW technology that measure the IV curve of each PV module remotely for solar photovoltaic (PV).

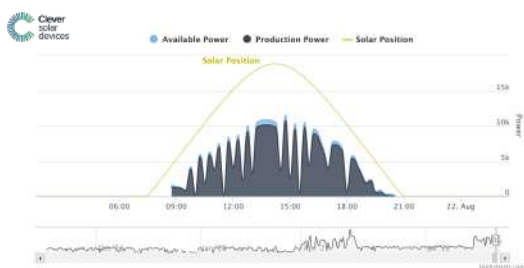

We provide the best and most accurate information at module level in 3-clicks.

We are a DIAGNOSTIC platform.

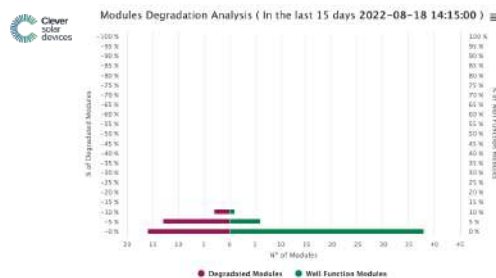

Complete and graphical Diagnostic

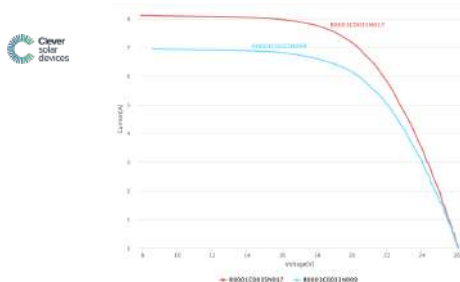

Available power vs. Production power

Modules Degradation

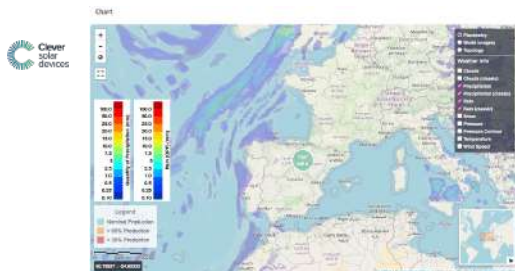

Detailed modules IV curves & comparisons

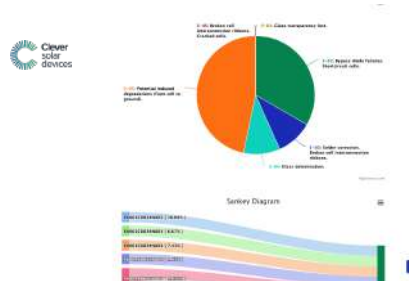

Recorded vs. Ideal MPPT

Live map view with Weather information

Type of failure of each PV module

Improve your Business decisions

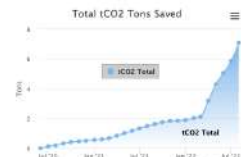

Business & CO2 emissions reports

Billing

Tons of CO₂ saved

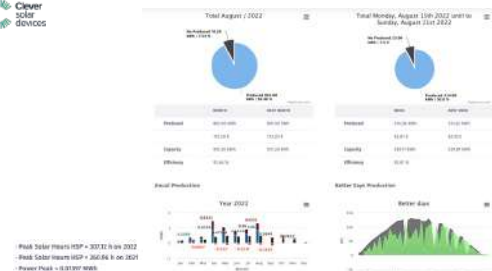

Full control of your business and your PV plant's fleet at a glance.

Take the most efficient business and operational decisions regarding the O&M in your installations to boost your productivity.
